

## Summer Learning for *All* Sea Turtles

All of our students have pledged to read and practice math facts over the summer, and will be bringing their pledge forms home soon. Parents can help by encouraging their children to read *at least* a book a week (10 total), and to complete their Reading Log. Parents can also encourage their children to play Reflex math on their computers or iPads. Here are more details about our school-wide Reading and Math Summer Learning incentive programs:

### Reading

2018 Summer Literacy Adventure! The 2018 Summer Literacy Adventure is geared to help children stay on target, motivated and excited about reading and literacy. During summer vacation, it is important for students of all ages and reading levels to spend time reading and writing on a regular basis. For more information and resources:

<http://www.fldoe.org/academics/standards/just-read-fl/summer-lit-adventure.stml>

Parents, please help your children choose the “just right books” for them. Typically, reading lexile levels fall in these ranges:

K	BR-199
1	200-299
2	300-599
3	500-799
4	600-899
5	700-999

Ms. Gallaher and Mr. Edeker recommend finding books in these ways:

<http://florida.lexile.com> “Find a Book”

Find Sunshine State Young Readers Award books at [www.floridamediaed.org/SSYRA](http://www.floridamediaed.org/SSYRA)

Also, spend time at the local library. Remember, summer reading should be fun!

### Math

All students were provided login information in May for their personal Reflex Math accounts. The program offers a highly engaging way to students to practice math facts, a critical component to math literacy and achievement. <https://www.reflexmath.com/>

Thank you for supporting our students during the summer so they’re ready to roll into the 2018-19 school year!
